

Quick Reference Stain Chart

Which product for which stain?

This cleaning chart will help you determine which cleaner works best on a particular stain. We have listed many common stains for you. Some complex oil stains require the application of both stain removers, one after the other, to remove both food-based oils and synthetic oils. Stains like vegetable oil, mayonnaise, and salad dressing should be pre-treated with a small amount of rubbing alcohol.

Crypton Care Fabric Freshener can be used on any fabric any time you want to freshen your upholstery. It can also be used in combination with any Crypton Care product.
